Conclusion.

Trump's Elections:

- Comparing the three news we finally conclude that two of three countries preferred Clinton , in Czech republic do not like Trump but they kept neutrals,also his news is the largest of three, for other side romania keeps neutral rewriting the speech of the elected president and in the most polemical side we found Saudi Arabia who hate Trump and in his news they focus on the bad aspects of his election.

Barcelona Attacks:

- Comparing the three news we finally conclude that The articles go straight to the point: Czech republic don like the polemical situation, Romania wants to punish the terrorists and Saudi Arabia is the largest new and they go straight to the people opinions.

Tomatina:

- All news conclude that is one of the most interested parties and one of most creative: We do not have the Czech republic opinion and Saudi Arabia got misleading information. Romania is full of information and it got true information.

CONCLUSIONS OF TRUMP ELECTION

In conclusion, the article in the newspaper of China is the longest and the most accurate. We think that this is like that because China and the USA has to much economic relations. The articles in the italian newspapers only describe the events happened. In the Stonian newspaper the article is very subjective because a great part of the new are comments minute to minute.

CONCLUSIONS OF BARCELONA ATTACKS

In conclusion, the article in the italian newspaper is the longest and the most accurate. I think that this is like that because Italy is closer to Barcelona. The articles in the China and Estonia newspapers only describe the events happened. In the china newspaper the article is completely objective because the news is created in a news agency, and in the Estonian newspaper the article is objective. It only mentions the names of the criminals and when it happened.
